Education

Marist College, Poughkeepsie, New York

B.S. in Computer Science

Minor: Cyber Security

Graduation: May 2026

GPA: 3.95

Relevant Coursework

Operating Systems, Algorithms, Computer Organization and Architecture, Intro to z/OS & Major Subsystems, Internetworking, System Design, Software Development II, Database Management, Mobile Security, Discrete Mathematics

Professional Experience

International Business Machine (IBM), Poughkeepsie, New York

Backend Developer Co-op

May 2024 – Present

- Modernizing a 50,000+ LoC Java codebase for the IBM Z mainframe patch lifecycle management system, tracking patches across all mainframe generations with individual release schedules.
- Identifying problematic modules, decoupled functionalities through re-implementation, and updating downstream dependencies with guidance from a senior engineer.
- Enhancing system stability by adding automated tests.
- Design and development of a tool to programmatically detect issues across all Z mainframe machines using data from hundreds of database tables and propose solutions for clients.
- Optimizing database queries using SQL, significantly enhancing time savings for hundreds of support staff.

Marist College, Poughkeepsie, New York

Resident Assistant

Aug 2023 – Present

- Fostered enriching relationships with 60 residents, enhancing their residential life through effective communication.
- Managed budgeting, maintenance issues, and resident conflict resolution, demonstrating strong conflict management and communication skills.

Projects

6502 Operating System Emulator

Aug 2025 - Dec 2025

Typescript, Node.js

- Studied and referenced the fundamentals of operating system architecture to build a fully functioning OS emulator.
- Features include a user interface to complete computational actions on behalf of the user.

NutritionU - A meal planner for students

Aug 2025 – Dec 2025

React, Vite, Node.js, Postgres, Postman

- Utilized modern web development skills to actively build a full stack web application that gives students a road map for cost effective and healthy eating.
- Used the Open AI application programming interface to build features such as modifying recipes for substitutions in the case of dietary restrictions, calculating the estimated number of macro-nutrients a user should be eating, and utilizing the ingredients in a user's grocery list to build a meal plan that fits within the applications personalized recommendations.
- Designed a relational database from scratch using PostgreSQL to query user data. This data is then analyzed and processed securely through robust data modeling practices.

Skills

Programming Languages: JavaScript, SQL, Python, Java, TypeScript, C++, Assembly, HTML/CSS

Technologies/Frameworks: React, ReactNative, Springboot, ExpoGo, Node.js, Podman, IBM z/OS, Linux, Git, JSP

Developer Tools: Visual Studio Code, Postman API, GitHub Enterprise, SwaggerUI

Extracurriculars

Ultimate Frisbee Player, Marist College, Poughkeepsie, NY

Aug 2022 – Present

Spiritual Life and Service Volunteer, Marist College, Poughkeepsie, NY

Aug 2022 – Present
